IONiONE series

Is The New Green

Careful thoughts have been put into the design and manufacture of Ion Series to minimize wastage of energy. We also enhanced the level of durability and reliability of our switches and switched socket outlets to reduce any environmental impact. As an expression of personal taste, you may even customize the material of choice for your preferred Ion Series.

Strong Technical background, Research and Development facilities had enable us to minimise pollution to the environment while manufacturing ION-series & IONE-series products. Material are stringently selected towards greener solutions objective. Let's start saving the environment together without leaving home.

Modern Work Of Art

Form meets function with a touch of style in the new ION-Series & IONE-series. Our fusion of contemporary design and eco-friendliness complements today's lifestyle while helping you conserve electricity, time after time.

Energy Is Not Cheap Anymore,
So Do Environment Maintenance.
Save Energy, Save Environment.

Smooth To The Touch

Besides pleasing to the eyes, what you notice immediately is the smooth finishing of our quality switches and switched socket outlets. You will certainly appreciate its ergonomic design that flows to your touch with no sharp edges. The best way to experience our work of art is to simply try it out yourself.

Not Only Look Better, You Will Feel Better.

Total Peace Of Mind

All our switches and switched socket outlets undergo stringent quality control to ensure the highest level of safety. Each one is intuitive to use and offers you complete peace of mind. With every flick of the switch, you are assured of the finest quality standard that will never go out of style.

Our ION-Series & IONE-series had go through tough International Testing Standards conducted by local authority, SIRIM MALAYSIA. With more than 33 years of experience establishment and technical support, our products offers worth worthy products compare to others.

Switch On Your Style

Take your pick from our wide variety of fine quality switches and sockets. Whichever you prefer, we have just the right one that complements your taste and blends seamlessly into your interior. Modern living has never looked better.

Always "Better Product & Service" Guarantee!!!

Not Only
Look Better,
You Will Feel Better.

Hotels & Accommodation

All our switches and switched socket outlets undergo stringent quality control to ensure the highest level of safety. Each one is intuitive to use and offers you complete peace of mind. With every flick of the switch, you are assured of the finest quality standard that will never go out of style.

Our Hotel Room Accessories had go through tough International Testing Standards conducted by local authority, SIRIM MALAYSIA. With more than 33 years of experience establishment and technical support, our products offers worth worthy products compare to others.

ECO SERIES CATALOGUE

FLUSH SWITCHES

TECHNICAL DATA

- 1) RATED CURRENT = 10A X 250V AC
- 2) POLYCARBONATE SURFACE PLATE-HIGH IMPACT AND UV STABLE
- 3) FIRE RETARDANT BASE FOR "LIVE" PARTS
- 4) OPTIONS OF SWITCHES : 1GANG, 2GANG, 3GANG, 4GANG and 5GANG WITH OPTIONAL 1 WAY or 2 WAY
- 5) FLUSH MOUNTING
- 6) IEC 60669:PT 1, BS 3676:PT 1, MS 616:PT 1
- 7) PILLAR TERMINALS-NON FERROUS
- 8) SCREW SIZE UP TO 1.2Nm
- 9) TERMINATION UP TO 2x1.25 sq.mm PVC CABLES

Dimmer Switches

400W Dimmer Switch *

ONE WAY WIRING

FUSED DIMMER SWITCH

The Greensafe dimmer has a large control knob to allow simple operation by combining together the function of light level adjustment and on/off switch.

Optional: The dimmer can be equipped with fuse-protected to prevent device damaging from an overcurrent fault.

Fan Control Switches *

The Greensafe fan controller is designed as a solid state unit to provide smooth speed variations from slow to full speed on most of the fans. Fan speed can be controlled to suit any conditions, depending on different applications. Only similar types of fans should be connected in parallel to minimize the possibility of resultant variable speeds.

Adjust the controller to low speed setting for constant, quiet circulation and change of fresh air; otherwise, adjust full speed for exhaust of stale air or steam in kitchens and bathrooms for maximum air flow.

* FOR YOUR REFERENCE ONLY. PLEASE REFER TO YOUR ELECTRICAL SPECIALIST FOR FURTHER DETAILS.
